Caution, check layout with actual binding screw holes before drilling ski.

To Ski Tip

Front Plate Template

Printing scale check, this box should measure 1 x1 inch

Print two templates. Separate heel and toe unit templates with scissors so you have long centerlines to match to centerline on ski.
 Locate front and rear on ski using this distance between screws per arrows above and below this box:
 Size "S" binding:: 218 mm
 Size "L" binding: 258 mm
 (Most people use the size "S.")

 ALSO: Locate 5th front unit screw 102 mm back from rearward pair of front screws. Look at the screw holes in the binding to explain this. Once you have the four front holes drilled, you can also locate the 5th hole by using the front binding plate as a template.

Rear Heel Unit Template

To Ski Tail

Match to tip/tail center line on ski.
